

For All Essential Applications:

The New EPSITRON® ECO Power Supplies

Slim, EN 60335 compliant and incredibly versatile: WAGO is expanding its range of EPSITRON® ECO Power Supplies with special models that have an even greater price/performance ratio.

The economically priced and compact EPSITRON® ECO Power Supplies offer versatile DIN-35 rail and screw mounting options, making them easy to install in ultra-compact control cabinets and devices. Each single-phase ECO Power Supply has a wide input range for AC voltages from 100–240 V and can be connected to utility grids worldwide. They provide 24 VDC nominal output voltages and models are available from 1.25–10 A.

Beyond control cabinets, the ECO Power Supplies are ready for a variety of consumer-oriented applications within the scope of the “household appliance standard” thanks to EN 60335 conformity. This enables WAGO to economically bring trusted industrial technology to everyday applications, e.g., vending machines, slot machines, coffee machines, as well as heating controls and ventilation systems.

Equipped with proven CAGE CLAMP® connection technology, WAGO's 787-17x2 Primary Switch Mode Power Supplies can be easily installed in both control cabinets and everyday devices.
