Your WAGO Newsletter

03/2017

Dear Customer,

we would like to present to you the following topics and products in this newsletter:

- Awards
- Energy Data Management
- WAGO Lighting Management
- Figures for Fiscal Year 2016
- And much more ...

Enjoy!

*Your WAGO Team*

#### Table of contents

✓ Rail-Mounted Terminal Blocks

✓ Relays and Optocouplers

✓ Automation Technology

✓ Corporate News

## Rail-Mounted Terminal Blocks

### WAGO Awarded "The Golden Catalog Seal"

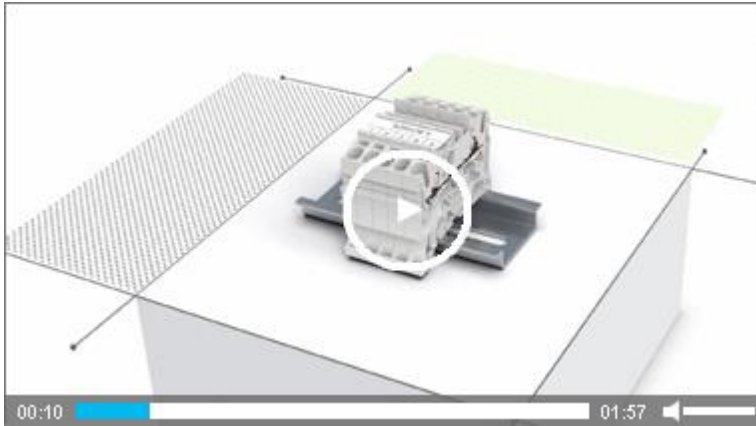

At the CADENAS Industry Forum 2017, WAG was awarded "The Golden Catalog Seal". CADENAS awards this prize to electronic product catalogs that have the most extensive intelligent information. WAGO's CAD download portal has been awarded the CADENAS quality seal in gold for a number of years now, attesting to its provision of continuous high-quality CAD data for engineers.

- In addition to the award ceremony, further focal points of the CADENAS Industry Forum included Industry 4.0, BIM and the optimization of production processes.
- WAGO has been working closely with CADENAS since 2003.

## WAGO smartPRINTER

Non-stop savings with the fastest marking system for TOPJOB®S rail-mount terminal blocks.

## Relays and Optocouplers

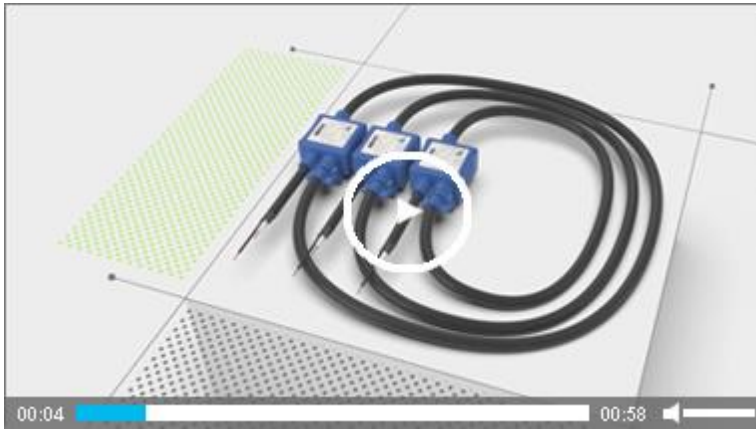

### LONG CABLES AND 2-WIRE SENSORS – RELIABLE SWITCHING

Special relay modules with integrated base load ensure defined switching, even with long line lengths or active 2-wire sensors, providing safe and reliable operation of your system around the clock.

## Successful Energy Management with WAGO

Reliable conversion of alternating currents with Rogowski coils – can also be retrofitted to existing systems.

# Automation Technology

## “Energy Data Management” – Available Now

The handy solution for collecting and managing energy data: After the new WAGO energy data application has been implemented, parameters can be easily set with the new PFC200 Application Controller (750-8202/000-002) instead of programming – no previous knowledge needed.

- Modular energy and process data collection, management and visualization
- Easy input parameterization via Web visualization
- Establish indicators to achieve DIN EN ISO 50001
- Connect existing sensors to the WAGO-I/O-SYSTEM

## WAGO Lighting Management – Stay in Control of Your System

WAGO Lighting Management is a practice-proven concept, which greatly simplifies planning, commissioning and operation.

## Always Perfectly Connected

The new WAGO CC-Link fieldbus coupler (750-325) connects the WAGO I/O-SYSTEM to the CC-Link fieldbus as a slave. Your benefits at a glance:

- Larger process image thanks to CC-Link V2.0
- Space and cost savings with complex applications
- Includes A WAGO MCS connector
- Flexibility of the 750 Series I/O System fully exhaustible
