3 WAYS TO WIRE = 1 FAMILY

TOPJOB®S Terminal Blocks

The TOPJOB®S family, with Push-in CAGE CLAMP®, was the first to introduce push-in wiring for rail mount terminal blocks. Since its introduction, new features and benefits have been added every year. Taking yet another leap forward, the family now offers levers and push-buttons for convenient and intuitive wire termination while maintaining the vibration-proof, gas-tight, corrosion and thermal-cycling resistant connection the industry has come to expect from us.

One Family

All 3 operating versions share the same Push-in CAGE CLAMP® technology and profile, which allows accessories to be shared across the entire family.

Same Jumper System

No matter which version of wiring operation, they all share the industry's broadest jumper offering, as well as the TOPJOB®S exclusive jumper retention spring.

Built-in Test Ports

Simplifies testing and troubleshooting for the entire family.

Push-in Wiring Technology

Push-in CAGE CLAMP®, invented by WAGO, is the universal connection technology for all conductor types. Offering fast, vibration-proof, gas-tight, corrosion and thermal-cycling resistant connection of solid and stranded conductors.

Continuous, Multi-line Marking

Continuous strip marking and the **smart**PRINTER offer the fastest and most economical terminal block marking. Multi-line marking simplifies wiring identification and troubleshooting.

TOPJOB[®]S TERMINAL BLOCKS

With Push-in CAGE CLAMP[®] - Levers and Open Tool Slot or Push-Button

Levers have long been associated with simplifying an action and the TOPJOB[®]S terminal blocks with lever operation are no different. With a lever on one side and a open tool slot or push-button on the other, wiring tasks are not only easy but also intuitive.

Lever Advantages:

- Simple - lever up, insert conductor, lever down – done
- Intuitive - tool-free operation ideal for field wiring
- Secure – opened lever “clicks” securely into place for hands-free wiring
- Hands-free - means both hands are free to cut, strip and insert the conductor

All Conductor Types 22 - 4 AWG:

Push-in termination of solid conductors

Push-in termination of ferruled conductors

Lever up until it “clicks”, insert the conductor and lever down for all conductor types

TOPJOB®S TERMINAL BLOCKS

With Push-in CAGE CLAMP® - Push-Button

Push-button operation has been part of the WAGO product offering since the founding of the company. Primarily used in PCB and chassis mount terminal blocks, it is now offered in our TOPJOB®S rail mount terminal block family.

Push-button Advantages:

- Simple – press down orange push-button with tool, insert conductor, release – done
- Intuitive – orange push-button clearly distinguishes wire entry from tool entry
- Options – push-button for rail-mount, as well as PCB and chassis mount, terminal blocks
- Unique push-button design ensures operation integrity with positive feedback

All Conductor Types 24 - 4 AWG:

Push-in termination of solid and ferruled conductors

Terminate fine-stranded conductors via operating tool

Remove all conductors via operating tool

TOPJOB[®]S TERMINAL BLOCKS

With Push-in CAGE CLAMP[®] - Open Tool Slot

The first member of the TOPJOB[®]S family and the one that started the “push-in” wiring revolution for rail mount terminal blocks. It introduced direct push-in of solid or ferruled conductors while also allowing traditional tool operation for all conductor types, just like the original CAGE CLAMP[®].

Open Tool Slot Advantages:

- Simple – insert tool, insert conductor, remove tool – done
- Innovative – industry’s first push-in wiring rail mount terminal block
- Secure – inserted tool is locked into place for hands-free wiring
- Hands-free - means both hands are free to cut, strip and insert the conductor

All Conductor Types 24 - 4 AWG:

Push-in termination of solid and ferruled conductors

Terminate fine-stranded conductors via operating tool

Remove all conductors via operating tool

TOPJOB®S TERMINAL BLOCKS

Accessories

Having the right accessories available is an important consideration when selecting the right terminal block for your application. With the broadest range of accessories in the industry, the TOPJOB®S family of accessories not only increases safety and functionality, but they also reduce assembly time, troubleshooting and costs.

Advantages:

- Exclusive jumper retention spring securely holds the jumpers in place
- Industry's most comprehensive jumper offering simplifies complex wiring tasks
- Multi-line, continuous strip marking is fast, economical and clearly identified
- One family — accessories fit all TOPJOB®S terminal blocks in the same series
